## Education

**University of Michigan** Aug 2020 – Dec 2023
*Bachelor of Science in Engineering, Computer Science (3.9 GPA)* *Ann Arbor, MI*

- **Awards:** Summa Cum Laude, James B. Angell Scholar, Dean's List, University Honors, Regents Scholar
- **Activities:** Theta Capital (VP), DIII Ice Hockey (2023 National Champion), Michigan Journal of Econ. (Editor)

## Experience

**FactSet** Remote, USA
*Software Engineer III* *Sep 2026 – Present*

- Leading development of a new full-stack agentic platform in FactSet's newly formed AI business unit — enabling clients to build custom AI agents, or deploy FactSet-defined ones, and run them directly on FactSet's proprietary financial data
- Designed and implemented the platform's core capabilities: an MCP-enabled architecture with agent orchestration, agentic workflows, scheduled routines, and a run-results dashboard

*Software Engineer II* *Sep 2025 – Sep 2026*

- Drove the ground-up rewrite of FactSet's flagship web platform (Vue, TypeScript), embedding the FactSet AI assistant into a reimagined workflow — launched to 150,000+ daily users with 99%+ client satisfaction
- Selected by leadership as one of 6 business-unit-wide nominees for the Dealmakers & Wealth Trailblazer Award

*Software Engineer I* *Mar 2024 – Sep 2025*

- Handpicked for the CEO-led task force that rebuilt FactSet's iOS and Android apps — owned the Markets tab (data and charting across all asset classes), built as shared Vue/TypeScript webviews in native Swift and Kotlin shells; shipped to 50,000+ users
- Maintained and upgraded core web platform infrastructure through nearly 2x user growth, optimizing for millisecond-level performance and workflow efficiency across 150,000+ daily users

**Agentic Coding Subject Matter Expert & Project Lead** May 2024 – Present
*Alignerr (Freelance)* *Remote, USA*

- Lead agentic coding projects across freelance AI training-data platforms, producing high-quality human data for training and evaluating frontier LLMs
- Partner with frontier AI labs to design projects targeting observed model failure modes; research QA methods (rubric design, gold-standard calibration, inter-annotator agreement) ensuring label quality and instruction adherence

**Software Engineer Intern** May 2023 – Aug 2023
*FactSet* *Norwalk, CT*

- Architected and developed 12 C++ REST API endpoints — 3 for each of FactSet's 4 in-house and vendor portfolio optimization engines — enabling buy-side quant clients to build optimal portfolios entirely programmatically

**Software Verification Engineer Intern** May 2022 – Aug 2022
*Gentherm* *Northville, MI*

- Developed a 3,400-line Vector CAPL test suite to validate internal test automation tools for automotive hardware, increasing testing efficiency by 80%
- Created and executed 200+ software/systems test cases on physical ECUs using Vector CANalyzer CAN bus simulation

## Projects

**Forex Visualizer & Sentiment Heatmap Analyzer** | *Python, Flask, React, Tailwind, Git*

- Real-time global FX visualizer and NLP-driven earnings-call sentiment heatmap — won Best FinTech Hack out of 486 participants at SpartaHack 9

**Stock Portfolio Optimization Web Dashboard** | *Python, Flask, React, SQL, Google Cloud*

- Portfolio-optimization dashboard building optimal, data-driven portfolios from holdings and cash, with backtesting — runner-up for Best Financial Hack out of 357 participants at MHacks 16

## Technical Skills

**Languages**: C++, C, Python, HTML, CSS, SCSS, JavaScript, TypeScript, Bash, SQL
**Frameworks**: Vue, React, Node, Flask, SQLite, Bootstrap, Tailwind, Vite, Vitest
**Developer Tools**: Agile, AWS, CI/CD, Claude Code, Docker, Git, Jira, Linux, MCP, Postman, Raspberry Pi, REST API, VSCode
